- Speaker Deck: <https://speakerdeck.com/FylmTM>

**Key technologies/areas:** Kotlin, Java, JavaScript, React, DevOps, Docker

**Preferred development environment:** Linux, IntelliJ IDEA, Terminal, Git, Docker

I am a passionate Senior Software Engineer with 8+ years of commercial development experience.

My skill set (not mentioning standard developer skills):

- Work with business and clients
- Lead development teams and coach junior developers
- Adapt to project constraints and quickly pick-up new technologies needed for a project
- Design project architecture, and implement it

## Experience

### Bilderlings

#### Senior Software Engineer

February 2019 - current

Technologies: Kotlin, Java, Spring, Micronaut, TypeScript, React.js, Docker, Kubernetes

Participated in development of new product in fintech area, as well as supporting existing platform. Product was microservice-based, where each microservice is developed either in Go, Java or Kotlin. Deployment was done into the Kubernetes.

### Neueda Technologies

#### Team Lead / Senior Software Engineer

August 2014 - January 2019 · 4 year 6 months

Neueda Technologies is software service company. While being there I have participated in number of different projects, in different roles. Each project was unique in terms of customer type, technologies, team size and duration.

Shortly speaking I had working on: desktop application, development tooling, web application, database integration into enterprise application, large microservice-based product.

### **Projects:**

#### **5G Network Service Orchestration (Ericsson)**

Technologies: Java, Docker, Kubernetes

Role: Team Lead

#### **Neo4j Desktop (Neo4j)**

Technologies: JavaScript, React, Webpack, Electron, Neo4j

Role: Team Lead

#### **Cypher Editor (Neo4j)**

Technologies: JavaScript, Webpack, ANTLR

Role: Team Lead

<https://github.com/neo4j-contrib/cypher-editor>

#### **Cypher plugin for JetBrains IDE's (Neueda)**

Technologies: Java, Neo4j

Role: Senior Software Engineer

<https://github.com/neueda/jetbrains-plugin-graph-database-support>

<https://neo4j.com/blog/jetbrains-ide-plugin-graph-database>

#### **Test Management System (Ericsson)**

Technologies: Java, Hibernate, JavaScript, MySQL

Role: Senior Software Engineer

#### **Neo4j database integration (Ericsson)**

Technologies: Java, Neo4j, JPA, JBoss, Ansible

Role: Senior Software Engineer

## **Transact Pro**

### **Software Engineer**

December 2012 - August 2014 · 1 year 9 months

Technologies: PHP, MySQL, PostgreSQL, Redis

Worked as part of the development team on developing and supporting Payment Processing platform. I was working on both frontend and backend, also providing technical support for our clients. One of my main achievement was introducing new ways of working, such as Git version control, CI and automated testing.

## **Wire.as**

### **Software Engineer**

April 2014 - June 2014 · 3 months

Technologies: Ruby, Ruby on Rails, PostgreSQL, Redis, Sidekiq, Angular.js, CoffeeScript

Participated in development of a project, as part of a small team in a startup accelerator.

## Ask.fm

### **Junior Software Engineer**

March 2012 - October 2012 · 8 months

Technologies: Ruby, Ruby on Rails, MySQL, Redis, Resque

Participated in Ask.fm social platform development, as a Junior Software Engineer.

## Technologies

**Languages:** Java, JavaScript, PHP, Ruby, Go, Kotlin

**Databases:** Neo4j, Redis, MySQL, PostgreSQL

**Backend:** Spring, Ruby on Rails, Dropwizard

**Frontend:** React, Angular.js 1.x, Internal Frameworks

**Infrastructure:** Ansible, Docker, Kubernetes, Helm

**Tools:** IntelliJ IDEA, Git, Jenkins, Confluence

## Languages

- English: Professional working proficiency
- Russian: Native or bilingual proficiency
- Latvian: Full professional proficiency
